### **PREAMBLE:**

**VISION:** Tarpon Springs is a community where children and families are safe, healthy, cared for and educated.

**MISSION:** Tarpon Springs Trauma Informed Community Initiative's mission is to provide everyone in our community with information on the causes and consequences of trauma, public and provider education, resource assistance and advocacy for appropriate *prevention and intervention services*. To effect long-term community improvement we work to increase awareness of issues facing members of our community who have been traumatized to promote healing.

#### **DEFINITIONS:**

**TRAUMA:** Trauma is the negative impact of experiences of events that happen to children, adults and communities as a result of physical, economic, psychological or environmental assault. Trauma may include physical, emotional and/or sexual abuse. Trauma may be caused by domestic violence, community violence, war, loss, natural disaster, long-term exposure to maltreatment and other conditions. Developmental trauma may begin before birth and continue across the lifespan. Trauma may be predictable or unforeseen.

The results of trauma may include severe injury, feelings of helplessness, inability to cope, stress, relationship difficulties, health problems, mental health issues and many others.

**TRAUMA INFORMED COMMUNITY:** Trauma Informed community refers to an awareness and comprehension of the root causes of trauma in the community. It expresses a commitment to understand, educate and provide resources to foster a safe and healthy environment where children and families can grow and develop. Identifying a network of schools, social service agencies, businesses, clergy, health care providers, safety and governmental offices and others who are committed to assist in the healing of trauma is essential in the formation of a trauma informed community. Through these entities the education, intervention and treatment of the effects of trauma will be accomplished. Using a strengths-based approach, individuals and groups will be assisted in defining their own capacities to contribute to developing a healthy community.
