

HEY! Let's all play MONOPOLY USA!

Here's how:

ROLL THE DICE to see which piece you get.
Instead of each player starting with \$1,500,
DISTRIBUTE \$7,500 among 5 players this way:

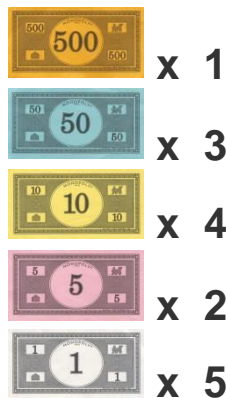

\$6,668

\$705

\$195

\$15

(\$90)

THE TOP 1/5 OF AMERICANS HOLD 89% OF THE COUNTRY'S WEALTH. Without passing Go or landing on Free Parking, they start out with enough cash to buy every single property on the board – with nearly \$1,000 left for houses and hotels.

Buying Boardwalk and Park Place **CLEANS OUT THE NEXT 1/5 OF AMERICANS.**

THE MIDDLE 1/5 CAN'T AFFORD MUCH: only Baltic and Mediterranean. After that, a bad card in Community Chest or Chance will clean them out.

With \$15, **THE NEXT 1/5 AREN'T REALLY IN THE GAME,** because they can't buy anything they land on. In fact, they don't have enough cash to pay rent for properties half the properties on the board, even without monopolies, houses, or hotels.

THE BOTTOM 1/5 START IN THE RED, and their only hope is landing on Community Chest or Chance, where there's 1 in 5 chance of drawing a card that gets them out of debt. Unfortunately, they have an equal chance of a bad outcome, like going to jail or going further into debt.
