

# Working with Childhood Trauma

Echo is now offering an in-depth training in childhood trauma for those professionals working with children and families who want a basic but comprehensive grounding in this cutting-edge subject. Certification of professional development hours will be available, as well as CEUs (see below for details).

Did you know that your grandparents' experiences can affect the way you respond to trauma today?

Did you know stress makes us more sensitive to things like sound?

How does community violence, poverty and bias such as racism contribute to trauma at an individual level?

Register today for this fascinating review of all that current science is telling us about the number one health issue of our time.

This training will cover:

- Building resilience
- Adverse Childhood Experiences Study
- The effects of trauma/toxic stress on attachment, the body and the brain of the developing child
- Trauma-informed care
- Intergenerational trauma- the legacy in our bodies
- Trauma responses and regulation
- Historical and social trauma
- Post-Traumatic Growth
