RESILIENCE

THE BIOLOGY OF STRESS & THE SCIENCE OF HOPE

SEPTEMBER 14, 2017 | 6:30 PM - 8:30 PM
UW-SUPERIOR, SWENSON HALL, ROOM 1004

About the Film:

This film uses beautiful animation and compelling characters to explore the science and the solutions. The film follows pioneering individuals who looked at the ACEs research and the emerging science of Toxic Stress and asked, Why are we waiting? Each took this new information and used it in new ways.

IF THIS FILM MAKES YOU WANT TO LEARN MORE CHECK OUT:

Becoming a Trauma-Informed Community **September 23, 2017 | 8:30 am - 4 pm**

Adverse childhood experiences (ACEs) can have a life long impact on individuals and their families. This full day training is designed to help participants develop skills to effectively support individuals affected by adverse childhood experiences and to build understanding and application of trauma-informed strategies community-wide. Open to the whole community, there will be sessions geared for early childhood/family serving professionals, K-12 professionals, and criminal justice professionals..
