Implementation Plan and Goal Attainment Scale

CREATING A TRAUMA- AND GENDER-RESPONSIVE PROGRAM

Organization/Program: _____ Date: _____

DOMAIN 1A: SAFETY ISSUES

The organization's/program's activities and settings consider gender-responsive issues (i.e., what are the different issues to consider for women, men, and transgender or gender-fluid individuals) to ensure the physical, psychological, social, and moral/ethical safety of clients.

For each identified issue with *ensuring physical, psychological, social, and moral/ethical safety for women, men, and transgender or gender-fluid individuals,* specify the required action to resolve the issue, the timeframe, and the person(s) responsible for that resolution. (The definition for each type of safety can be found in handout 8.) After implementing changes to address the identified issues, the organization can evaluate whether the goal was attained, reflect on what was learned, and determine what changes still need to be made.
