

Connect All

Addressing all that can
be addressed in
existence for the most
safety and hopeful
possibilities.

Gwendolyn J Downing © 2021

Existence is what it is until
we either find, create, or
another answer becomes
available. We have to
understand the reality of
our existence and do all we
can for the most safety and
hopeful possibilities.
Current existence gives no
option in how that works.
We are interconnected,
with the simultaneous
conflicts. So we live
interconnected.

Connect All Guide

September 17th, 2021 version

Assembler and Initiator

Gwendolyn J Downing

Contact: GwendolynJDowning@gmail.com

This document is not a book nor a manual. It contains key points to get the information to others as quickly as possible, along with being able to be used for trainings or meetings.

As of the date of this document, the references included could be updated. For example, the section on environment and climate was compiled earlier in 2021, before the International Panel on Climate Change (IPCC) report came out in August, and other information that continues to be made available.

This is a working draft document, because when there is a need, you assemble and share as you go.

*The above was written for Module 1 “completed” on Sept 9, 2021. Modules 2 and 3 were added Sept 12, 2021, and are definitely base *rough* draft, need references added, and are included now to share, while knowing there are others with backgrounds and information whose input will make them what they need to be.

Dedication

For my one known attachment – I define attachment as, I am unconditionally committed to the other having the most safety and hopeful possibilities until no longer needed.

For any family that might exist – I’m looking for you.

For every child and innocent – I know.

For all the above – if only.

~LPV

CONNECT ALL

Introducing the Connect All initiative

Hi,

I'm Gwen, and while I don't know your name, *(your name)*, you matter.

Let me begin by asking you to take the best care of yourself that you can - that's an always statement. If you need support, I ask you to reach out. And if the support you need isn't available, I ask you continue to do the best you can to take care of yourself. *(Resource pg48-50)*

Now a little about **Connect All**.

To give some background, I was and am looking for answers for myself, for someone I am attached to, and for every child and innocent. Connect All came out of that search.

As to what the initiative is about: It is to globally address all that can be addressed for the most safety and hopeful possibilities.

At present some suffering is unavoidable, but the current and possible cost of all we could address is beyond my ability to succinctly communicate, if at all. We live in an overall illogical-disconnected world. I know that reality on a personal level and recognize the differing degrees of it for all life. Connect All is about what we need to do as or/and for each of the 7.89+ billion (data Sept 7, 2021) individuals on earth and all of existence.

I am a realist. I understand the magnitude of what is needed, but also that it is necessary and doable. Connect All covers the foundation to the tough topics, in three modules:

Module 1: Foundation and First steps – The foundations for the approach, and where we start as an individual, and *(if applicable)* unit/family. Which is also the foundation and first steps in contributing to the necessary global change.

Module 2: Reality of Our Existence- Goes into vital elements of our existence we need to have a shared awareness of before we can move into frameworks.

Module 3: Now and Forward Frameworks, and Tough Topics - Gives realistic adjustable frameworks based on the data as we have it available and the functionality of the whole - and there is no perfect, so depending on the area we put in margins for the fact we can't be perfect, but still need boundaries to keep us within acceptable limits. Then with those frameworks, and the foundation from the other modules, we work through the tough topics the best we can.

It seems like a lot - as I said, necessary and doable.

Gwen

MODULE 1 Foundation and First Steps

Foundation and First steps

The foundation for the **Connect All** approach, and where we start as an individual, and (*if applicable*) family/unit. Which is also the foundation and first steps in contributing to the necessary global change

Objectives:

- Use base logic
- Understand logic-connection as a foundation
- Understand the connection of our existence
- Understand every moment matters
- Understand and be able to use **“Five through the Filter”** - An individual self-care framework, which contributes to as a community, creating the necessary global change.
- Have a foundation to start thinking about what’s next

Connect All

ONE GOAL

To address all that can be addressed in existence for the most safety and hopeful possibilities.

AUTHOR'S TWO MOTIVATIONS

1. I need the most safety and hopeful possibilities for myself, and for who I am attached to.
2. I both want to positively and don't want to negatively, tell the children and innocents of the world, "Here is what I was doing this moment when you needed me."

Base Logic

We begin with some base logic: Anything unanalyzed means we move forward without knowing what is known, not known, nor the possibilities. This means a higher risk of experiencing, creating, or/and allowing injury, and higher risk of not working towards what is hopefully possible as best we can.

So, for the most safety and hopeful possibilities, we need to analyze our entire existence, reanalyze as we learn more, and function from that reality.

Let's pause on that point. We recognize our global efforts towards analyzing our existence, isn't being done in some areas, and in the areas where analysis is being conducted, the efforts are not coordinated, synthesized, nor shared as we need them to be. Recognizing that, we logically analyze why they aren't, and that answer is a point of understanding why we aren't addressing all within our ability in the best way possible - which leads us to the next point. Noting first, that we will come back to how we address this need, as part of addressing all within our ability.

Logic and Connection are the Foundation

Understanding Logic and Connection and the application of them, is the foundation of addressing all that can be addressed. To explain their foundational importance, let us begin with definitions.

Logic - Objectively thinking things completely through, considering all possibilities.

CONNECT ALL

Then there are two areas of connection, *internal* and *external*:

- 1 *Internal Connection* - we value ourselves, understand how we function, and stay self-aware.
- 2 *External Connection* - we know why and how to connect to others and all that is.

Neither internal nor external connection require emotion, but it is important to incorporate the emotional when applicable.

The **GLOBAL** Overall Lack of Logic and Connection

As to their foundational importance, if we analyze all that we can address for the most safety and hopeful possibilities: Child abuse, violence, poverty, racism, disparities, *all the ways people de-individualize others*; cruelty to animals, the environment, other areas that impact our own personal-universal survival; hopeful possibilities; everything that is within our ability to address - the lack of logic-connection is either the cause of or/and the reason it's not being addressed as it could be (This point will become even clearer when we get to the section on *Every Moment Matters*). And beyond regret, most of us (within functionality) haven't been appropriately taught, if taught at all, the why and how for logic and connection. Then, the very fact that we haven't taught this as it has needed to be and needs to be, again shows the lack of logic-connection.

Analogy – We have a body (world) with multiple issues and injuries – child abuse, environmental, all the things we are trying to treat, and while what we are doing might be working to some degree, we haven't addressed that the body isn't getting sleep and basic nutrition, and haven't analyzed the body as a whole and how the approaches are connected. So, what we are doing that might be working, is also wasting time, resources, and life, that if we understood the body as a whole and made sure its foundational needs were met, we would be much more effective.

Note: With my second motivation for children and innocents, there is the need to highlight a point. While there is child abuse as we have defined it – when we talk about issues such as racism, poverty, disparities, and so on, while they apply across a spectrum, they are forms of child and innocent maltreatment.

Basic Impact When We Lack Logic and Connection

If as individuals (*within functionality*), we don't know how to connect to ourselves, how to think logically, and why and how to connect to others, we have increased risk of:

- Being unintentionally dangerous to ourselves or/and others

CONNECT ALL

- Not being able to do our best for ourselves, and as part of that, contribute our best to our global community.

Understanding the why and how of logic-connection is foundational, for the most safety and hopeful possibilities – as individuals and a global whole. Which gives us this foundational component that for the most safety and hopeful possibilities: that within functionality, we each need to be fully given all that is available for us to be as logical and connective as possible – and anything lacking to do that, we are working to find – and then we fill in for each other as needed.

Our Known Connection and *Every Moment Matters*

We need to understand one key fact of how our world operates: Whether of our true free will or not, what we and others are doing or not doing right now affects our and other life's safety and possibilities.

Note: While I acknowledges the prior work done on explaining interdependence, for authenticity and to be closer to accuracy, that term isn't used in these materials.

Now, taking that fact through the goal:

- For the most safety and hopeful possibilities for myself and (*if applicable*) who I am attached to:
 - Every moment matters for me to be doing the best thing possible (We will go through how we decide that in *Five through the Filter*).
 - Because what we are each doing or not doing impacts each other, I need others to:
 - Whatever extent possible have what they need, for them be able to contribute their best to our world, and decrease the risk of them being unintentionally dangerous.
 - Understand how every moment matters.

And for those who might not have the conscious capacity or functionality to care, or are at a place of currently not caring about other life, in part or all: As an individual I can be ambivalent about to actively dislike everything in existence, and to personally have the most safety and hopeful possibilities, the same things will be required of me, as someone who has the capacity or/and currently does.

Logic-Connection + Every Moment Matters

Before we continue, let us combine what we have covered so far.

For all individuals (*within each's functionality*), to decrease the risk of being unintentionally dangerous and able to contribute our best to our global community for the most safety and hopeful possibilities, we need to be doing all we can to ensure that:

- We each know why and how to connect to ourselves,

CONNECT ALL

- We each know why and how to connect to others,
- We each know why and how to think logically,
- We each know that every moment matters
- We each have to whatever extent possible what we need

And as community, we create the balance.

Now, before we get to the Five through the Filter framework, we have one more component.

Three Areas that Need to Be Addressed

The world has so many issues that are within our ability and that we must address. We know that for the most safety and hopeful possibilities, we must address all of them, and do so with logic-connection. But how can we do that as individuals, *(if applicable)* unit/family, and as a global whole? Let's start by breaking them down into three primary categories:

To whatever our degrees *(it applies to me 0-100%)*, and whether of our true free will or not *(there are so many things we “choose” to do, because our world leaves us with no other option)*, we are experiencing, allowing, or/and creating:

- 1 Injury *(child abuse, violence, poverty, racism, disparities, all the way we de-individualize, animal cruelty, unexplained, and so on)*,
- 2 Environment and climate injuries - our bodies and world.
- 3 Not prepared for possibilities, including possibly imminent worse.
The first two could go together but are purposefully kept separated. Let us go through each of them a bit more. Remember for each individual it is: *to whatever our degrees (0-100); whether or not of our true free will; experiencing, allowing, or/and creating.*

Let's expand on each, then reflect on how they can impact each other.

Injury

Experiencing: What we ourselves might be experiencing.

Allowing: What we are allowing, if we could be doing something about it.

Creating: We might be unknowingly contributing to it, e.g., through purchases *(e.g. child labor)*, or, because we are not educated, through our own words and behaviors.

CONNECT ALL

Environment and climate injuries - our bodies and world.

All the data on climate and environmental impact – we are experiencing, allowing, or/and creating:

- The possible impact on people assigned male at birth (AMAB), reproductive issues in sexes and within the sex spectrum, and so on.
- How places that aren't contributing to the issue are now being affected by those who are, e.g., it travels to other places by water and air, places shipping our trash.
- People being impacted in utero to dying from pollution.
- Weather and Natural Disasters
- Forced migration due to climate change
- By 2070 1/3 of people might be in unlivable heat
- We are in our 6th extinction for the first time due to people
- We are using more resources than the earth has
- All the environmental warnings.

Not Prepared for Possibilities, Including Possibly Imminent Worse

There is the basics of individuals to systems not prepared for the possible array of an accident, weather, emergency, pandemic, to incident. We don't live prepared from basics, to violence, to nuclear, to solar flares, to asteroids, to possible other-being invasions, and so on. And it could all happen today.

Again, on the global view, outside of wanting to do our best by others, we understand how everyone not having what they need to be as mentally and physically prepared as possible, makes us vulnerable from any type of event, from an accident to an incident.

And even if it wasn't anything "out of the ordinary" every time we aren't prepared, we know there is the possible waste of resources we already need, to situations where violence increases (child abuse, domestic violence, sexual violence, crime, and so on), and the cost to the individuals and the world.

How might those three impact each other?

Logic – Connection + Every Moment Matters

I know every moment -

- the cost of all that we should be addressing,
- what all could possibly happen that we aren't prepared for,
- how our lives are connected,
- how what I'm doing or not doing impacts,
- could be my last.
- I don't want to do "something", I want to be doing the best thing possible.

And as a whole, we need to be trying to make sure, within functionality -

- We each know why and how to be connected to ourselves,
- We each know why and how to connect with others,
- We each know why and how to think logically,
- We each know that every moment matters
- We each have to whatever extent possible what we need

And as community, we create the balance.

How We Address All That Can Be Addressed - Foundation

Five through the Filter

Knowing the foundational pieces and having our issues in those three categories, we now have what we need for how we can individually (*within functionality*) to globally address all that can be addressed. A way to remember the process is in the name for it "Five through the Filter".

An individual self-care framework, which contributes to as a community realizing our global need.

First an overview, then we will examine each component one by one, then go through how it works as a whole.

An important note before we begin:

- Individually
 - With practice, doing what we need to gets easier.
 - For our goal, we do the best we can on our own.
- So much gets much easier as more individuals are connected and doing it!

CONNECT ALL

Five through the Filter

My Filter:

Going back to “How do we decide what is the best thing to do every moment?”, we need a way to do that, and that is what our filter is for. We won’t be perfect, but it helps us do the best we can.

To the best of my situational ability, my daily five is filtered through:

- I live with the most logic-connection I can.
- Goal- The most safety and hopeful possibilities.
- Every Moment Matters - Knowing the cost and possibilities to life (ours and other).

My Daily Five:

- Take care of myself, and *(if applicable)* those I’m responsible for.
- Take care of my environment.
- Do something to be prepared.
- Be informed and understand more.
- Ask/help others on some level to become aware and involved to the need for a logic-connection global approach.

CONNECT ALL

Going through components

My Filter:

I Live with the Most Logic-Connection I Can.

Let us begin with a quick review of the definitions:

Logic - Objectively thinking things completely through, considering all possibilities.

Internal Connection - We value ourselves, understand how we function, and stay self-aware.

External Connection - We know why and how to connect to others and all there is.

Depending on our situations, we may be in different places of the process to learn or/and apply. And for many of us, healing is part of the process, and we need additional support or/and resources. For both of those points, it would not be practical to try and incorporate all the information we globally have available in this guide. And the hope is as you go through this and after - you will either be linked with, have access to, or we would eventually get the entirety of what you need for logic-connection to you, as we do this together. So, for now, we will just do a rudimentary overview or/and review of the basics, to be on the same page, and understand the process that will be outlined at the end of this section for our filter. We are going to start with connection, then cover logic, then put the two even more together to have that process for using them.

Connecting Us

What does it take to be internally connected and self aware? As with everything, we start with logic, analyzing and understanding ourselves and how we function, within the limits of what knowledge we currently have. And as we work to understand ourselves, we consider:

- What do we know?
- What do we not know?
- What is possible?

Keeping In Mind

- What we don't know is more than we do. - *e.g., it was just in 2020 they discovered a new organ in the body <https://www.livescience.com/new-salivary-gland.html>. There is no definitive understanding of how our minds/consciousness/?? functions. And so on.*
- What we do know might change. - *Whether due to an actual change, or what we "knew" was wrong as new information is realized.*

CONNECT ALL

- There may be individual differences. - *We are all individuals and might have different ways in which we are conformed or/and function. Sometimes there are just anomalies.*
- Our own journey (*with compassion*).

Let Us Start

From fertilization, there is “nature” and “environment”. And that continues throughout life, with the additional variable of “our actions”. Whether our actions are of our true free will has some depends. What is vital, is we are aware of everything that makes us us, and act out of a place of understanding.

So, as I can, to the best I can:

- I know how my thoughts, feelings, behaviors, and physiology are connected.
- As needed, I address possible impairments to self-awareness and logical processing.

Examples:

- Challenges in my ability to attune to my inner processes and experiences (*Challenges can be as simple as sinus infection, migraine, medication reaction, or as complex as we as individuals might be*).
- Not studying and understanding where my thoughts and feelings come from (*Even when we know how, we might have only done so in certain areas or/and then not continued*).
- Not seeking feedback, when accessible (*And when assessable, we still must determine its value*).
- I stay aware of how I am doing physically, feeling emotionally, and where I am mentally.
- I use my personal skills to center and have my plan to stay centered or re-center as needed (Center = able to function-focus to the degree I need to and can. *Things can't always be calm, we aren't always in a "positive" space, but we can stay centered as can be*).

Then, **external connection** is also sometimes a process, and there are so many skills to learn and apply.

Practicing Logic

- Objectively think through everything. This process doesn't stop at what is found, but all that is possible.
 - Question everything, even what we think we know to be fact. How do I know this? What's the evidence? Could there be other explanations? Has new information come out?
 - Search for all facts and list out all possibilities. Here is what I know, here is what I don't know, here is everything that might be possible.

CONNECT ALL

- While this is implied in considering all that is possible, to be clear, we must be open and looking for what we don't have a working knowledge of. We make the best lists we can knowing there might be a possibility we don't have enough knowledge to think of - which is also listed as a possibility. All possibilities.
- Depending on what is being analyzed, we might:
 - Analyze for all possible sources, commonalities, differences, gaps, variables, anomalies, patterns, in and across time, the why, or/and so on.
 - Break the issue down for costs, risks, benefits. Again, listing what is known, what is not known, and all possibilities.
- We accept and hold all possibilities. For example: Our existence might be from evolution, creation, simulation, or a mix. We might be part of a multi-verse. There might be multiple dimensions. And so on. We don't know. So, while we continue to analyze and research what we can, we accept and hold all the possibilities.

Basic Logic Process:

- Analyze everything - this is ongoing, and we adjust based on the data and functionality of the whole.
- Make decisions based on logic-connection and our goal for how to:
 - Do what is addressable
 - Work with what currently isn't
 - Work for what is hopefully possible
 - Prepare for possibilities
- Take action (including doing nothing).

Logic-Connection

So, putting them together, here is a suggested process for the filter:

- Be and stay centered as you can be,
- Analyze everything for every possibility.
- Constantly check any bias
- Accept and hold all possibilities, then choose our functioning construct with the most logic-connection for ourselves and others. Then, if new data becomes available, re-analyze our construct and if needed adjust.
- Do the process for: What is addressable - Work with what currently isn't - Work for what is hopefully possible - Prepare for possibilities

Then - if situationally needed, no choice reactions without community*. There might be things you don't know or a perspective you don't have. (**Unless absolutely no other options.*)

CONNECT ALL

Again, this does get easier as we have community. For example, we do need to analyze everything for every possibility. And while there are the everyday, “It says orange juice. So, I’m going with it is orange juice, even though someone could have filled it with something else or put something in it, or/and so on, and I’m prepared for that if it is true.” or “I just hadn’t thought this through before.” (e.g., all the possible reasons for a person’s behavior, all the possibilities of existence), that we can and should do individually, there are the things outside of that, that the more we are connected to others to work through together, and the more we change as a world so that the information we need is analyzed and shared as we need it, the easier it becomes.

And before we move on, one other note on Logic -Connection. Once we are as internally connected as we can be, then logic is easier to practice, if sometimes hard to cope with. When we are logical, the awareness that can come with logically thinking through, accepting, and holding all possibilities, might affect us in ways that make it hard to function, unless we have the logic-connection foundation for our construct.

So, while having logic-connection is foundational for us to be our best us and achieve the most safety and hopeful possibilities, it is work and there are challenges with it.

My Goal- The most safety and hopeful possibilities.

Every decision we make is connected to our goal – “What leads to the most safety and hopeful possibilities?”

Every Moment Matters - Knowing the cost and possibilities to life (ours and other) in time.

I know that every moment of my life I must be aware of the value of that moment - every moment cost and possibilities in life, for myself and others.

- the cost of all that we should be addressing,
- what all could possibly happen that we aren't prepared for,
- how our lives are connected,
- how what I'm doing or not doing impacts,
- could be my last.
- I don't want to do “something”, I want to be doing the best thing possible.

And with the three parts of our filter, after we go over the components of our Daily Five, we will go through examples of using the filter to make those decisions for the best thing possible- *knowing we won't be perfect, but it helps us get as close as we can.*

CONNECT ALL

My Daily Five –

5

- Take care of myself, and (*if applicable*) those I'm responsible for.
- Take care of my environment.
- Do something to be prepared.
- Be informed and understand more.
- Ask/help others on some level to become aware and involved to the need for a logic-connection global approach.

NOTE: *Everything is always to the best we can based on our situation.* Then, as mentioned previously, *this gets easier as all do what they can.* And with that, for individuals based on more serious situations, there would be differences in the ability to do the five, and where we would need to be community for them to be able to do all five. We will address that a bit in the decision-making process after the components.

Take care of myself, and (if applicable) those I'm responsible for, the best I can.

- All that keeps me healthy and connected as possible is foundational - sleep, nutrition, hygiene, exercise, mental health practices, if applicable medicine or/and health care, relational needs.
- Making sure I have income or/and my needs met.
- Basic chores and maintenance.

NOTE – while every part of *Five through the Filter* is about taking care of ourselves, this one can be more simply remembered as “Take care of myself”.

Take care of my environment.

Possibilities include refuse, reduce, reuse, recycle, repair, repurpose, upcycle, and rot (compost). Think sustainably.

Do something to be prepared.

There are websites with easy checklists to help get started on what every individual, (*if applicable*) unit/family, should have and know. For the daily five we want to do **one** of these:

- **An item:** Find or buy one item I need, e.g., I might find free items in local groups, on Facebook marketplace curb alerts, and so on. It might be something I have or find and repurpose. I might trade items with someone.
- **An action:** e.g., complete my ICE (In Case of Emergency) and print it off to have with me.
- **A skill:** e.g., while eating I watch a 3–5-minute video on a skill like first aid, how to put out a fire, or so on.

CONNECT ALL

Be informed and understand more.

For the most safety and hopeful possibilities, we need to be informed and understand our world the best we can. Learning and understanding takes time. And while we are working to get information analyzed, researched, synthesized, and shared in a way that is more efficient for all of us, we have to do extra work in the meantime. So just like the being prepared, we do a little each day.

Examples:

- I take time to scroll the news instead of watching it, so I can pick what is important but have a base awareness.
- My google feed is a scroll of emerging science from diverse fields, where I can pick what is important but have a base awareness.
- I check certain social media for certain info
- I try to think through all possibilities.

Ask or/and help others on some level to become aware and involved to the need for a logic-connection global approach.

Every day we ask or/and help others on some level to become aware and involved to the need for a logic-connection global approach. Since until we have that, we can't live our own lives with the most safety and hopeful possibilities, and the current and possible cost is beyond succinct communication.

There are two approaches that are "and" and not "or":

- Getting to lots of people.
- Networking with those who have influence or/and resources.

Who can you reach out to immediately to share with? Can you write an email letter others can also use? What other ways can you ask or/and help others?

Let's look at an example of how to guide someone through this:

The Need for a Logic-Connection Global Approach

Everything within our ability to address has logic-connection as a foundation. Yet, analyze how we live, and you will realize how we lack logic-connection as a functional whole. And I say that with humility from my own life. But, whether due to lack of education on the fundamentals or/and application or not, the evidence is indisputable of the reality of the lack of and need for.

Let's break down how logical-connection is foundational for the most safety and hopeful possible, from an individual level to the global whole.

Individual Level:

If as individuals (within functionality), we don't know how to connect to ourselves, why and how to connect to others, how to think logically, and haven't to whatever extent possible been given all we need, we have increased risk of being unintentionally dangerous to ourselves and others, and not able to do our best for ourselves, and contribute our best to our global community, for the most safety and hopeful possibilities.

Global Level

If we were logical-connective, how we live would reflect that. Let's just start with basics.

- Knowing the importance of each individual (within functionality) having a personal foundation of logic-connection, we would globally ensure it asap.
- Knowing the importance of each person having what they need, we would be working on it in a more logical-connective way, which includes asap. This also leads to the next point.
- Anything unanalyzed means we move forward without knowing what is known, not known, or the possibilities. Which also means higher risk of experiencing/creating/allowing injury and not being able to work towards what is hopefully possible as best we can. If we want the most safety and hopeful possibilities, we must analyze, reanalyze as we learn more, and function from that reality. Knowing this, for the most safety and hopeful possibilities, our entire existence must go through that, and our global efforts towards doing so would be done, coordinated, synthesized, and shared as we need them to be.

Logic-Connection (LC) is the foundation for all that is within our ability to address. And being LC for myself and (*if applicable*) who I am attached to, whether I cared about any other life or not, the same would be required of me. For me and who I am attached to, to have the most safety and hopeful possibilities, there must be a LC world ASAP! And then, because I am connected to other life, I want to tell the children and innocents of our existence, "I did all that I could for there to be a LC world asap."

CONNECT ALL

Using the Filter and Daily Five together

So now that we have our Filter and Daily Five, how do we make those decisions? A few points before we go through some examples.

- It is always to “The best of my situational ability.”
- We analyze everything we do– Should I be doing this or not?
- We analyze how we do things – What is the cost in time? What is the cost in resources? Is there a way to do it better?
- We think through how the five might intersect, and if they conflict how to prioritize.
- We cope with the reality that because our world is the way it is right now, there are things we can’t do the best we can.
- It gets easier with practice. And the more everyone does their part, the easier all of it will be.

CONNECT ALL

Some examples:

- **Washing our hands** - We know we want to do this efficiently, since we know the cost to lives in time (*every moment matters*), and it helps conserve water (*taking care of my environment*) and saves money that can help with *taking care of myself, doing something to be prepared, or asking/helping get others involved*.
- **How we prepare our food** - We think through things like “Should I heat this?” “Add spice?” for the time taken (*every moment matters*), and the energy and resources used (*taking care of my environment+ money for other areas*). Then we also consider how that impacts our self-care (*taking care of myself*). So, while a routine is to not heat or use spices as much as possible, sometimes it needs heated more and certain spices are used to help our body.
- **Repurposing** - When we consider items we can repurpose (*taking care of my environment and taking care of myself with resources*), that can also help us with our finding one item (*doing something to be prepared*), e.g., empty cans can be used for candle holders. However, somedays with time available and all the other priorities in the Daily Five, you might not take time to wash something to recycle or repurpose and just throw it away, because you also must do what else is needed, e.g. “I am experiencing avoidable injury, there are children and innocents who need me now, something worse might be about to happen, I have got to reach out to ____” (*ask/help others become aware and involved*).
- **While we want to be an educated consumer on:** What is this doing to my body? The world? Is this from wrong testing? Is this from any type of labor that shouldn't be? And then if so, what happens if I stop, do they have to do something worse? There can be the reality of both our finances/resources and for sure what is the best use of our time. If we can know, or absolutely need to know (e.g., allergies), “great!”, but the better use of our time is focusing on getting the system changed, so those are not even things we have to investigate and might not be able to make any better decisions about based on our situation (*Every Moment Matters + LC + Goal*).
- **Everything matters.** For example, having a long email address. There is the cost to life and possibilities from the time to type, more resources used during that, and then more storage which also has an impact. It might not be best to change that now, but what are other small areas like that I can change.

CONNECT ALL

Some of my examples include:

Take any part of our addressable existence and it will fit somewhere in "5 through the filter". Aspects of my existence that I want to address, e.g., trash in my neighborhood, the economy, protecting myself, etc.:

If applicable, how does this apply for my individual or field of work?

CONNECT ALL

Now, remember how we said that this gets easier, both as we practice, and the more others are doing it? There is that level of change, but let's think about a future where we are no longer advocating for a Logic-Connection world but living in one and look at how Five through the Filter will both stay the same and change.

My Daily Five – in the future

- Take care of myself, and (if applicable) those I'm responsible for.
We have more hopeful possibilities for how we do this.
- Take care of my environment.
We have more hopeful possibilities for how we do this.
- Do something to be prepared.

We have more hopeful possibilities for how we do this, with more focus on skills and lifestyle.

- Be informed and understand more.
We have more hopeful possibilities for how we do this, and information is assembled and shared as we need it.
- Ask/help others on some level to become aware and involved to the need for a logic-connection global approach.
Transitioning, learning, and doing what is needed for a logical-connected world in a systemic way.

Closing LC Experience for Module 1

Use your skills to CENTER

You're looking at a blank screen because it's the best way. If you feel safe closing your eyes, that might help. However you choose what is best for you, listen to the words and do your own connection.

Picture all of existence.

In the all, focus in on yourself. If the world isn't what it can be, you will never have the most safety and hopeful possibilities.

Now focus out and connect to the suffering of all life.

Now pull in a bit and focus on every child and adult who needs us now.

Every last one.

In real time our realities are connected.

Whatever they are 'living' through or as they might be dying, we can't close our eyes, cover our ears, turn away, or disconnect in any way.

And they know we are here.

With that connection, we think

What would we be doing this very moment?

Would anything stop us?

What would we say to them about the decisions we are making?

What if we were the ones living or dying through it?

Now, refocus and connect to every child and innocent that needs us right this moment.

All of them.

Everywhere.

Be a part of their realities.

Hold that connection, and now, look into the future.

Connect to every child and innocent that is going to be where those children and innocents are, or maybe more or worse, in the next few days, weeks, and months if we don't do something.

We are capable of making the choices and doing what is necessary to reach each of them it is not too late for. Yet we live disconnected from desperation and pain that should be our own. While they wonder where we are, don't know they should wonder, have stopped wondering, or no longer can here. If it was your or my child we wouldn't rest, and being connected as we are, every child and innocent is ours to care for that way. And if it was you or me, we wouldn't understand the rest of us. And then there are our own needs.

Whatever our reasons, even the most innocent ones, we have all been part of what could have and must be addressed. So, we must cope with that and do what we must do now. We process - as every moment matters. (Process, support, resources, whatever is needed)

CONNECT ALL

One Goal

To address all that can be addressed in existence for the most safety and hopeful possibilities.

That might sound hard, but it is necessary and doable, on an individual level and as a global community.

Let's begin.

Transition time to Module 2

In the meantime, as you start to think through everything, things might get rough. But we are all connected, so connect as you need to. If you need connection reach out, and if someone needs connection reach out. *(Resources pages 28-30)*

*When you're hurting, when you're being forced to hurt yourself and others, when who you are attached to has both different and the same needs, when the children and innocents of existence need you now, and you're aware it could get worse imminently, you get and stay focused. That's logical-connective, and where hopefully hope exists.
Take care of yourself the best you can, Gwen*

MODULE 2

Module 2: Reality of Our Existence- Goes into vital elements of our existence we need to have a shared awareness of before we can move into frameworks.

Objectives

- Recognize the unknown truth of our existence
- Understand the Losing Premise of our current existence
- Understand elements of the Unexplained and Unknown
- Understand the process and importance of identifying source(s).
- Start/complete a reality-based ICE, Advance Directive, Safety Plan
- Continue to create our networked-community
- Have the foundation and start thinking about what's next

Notes and Reminders for this module:

'LC' is used for every form of logic-connection, e.g. logically-connectively.

LC is our foundation.

Our goal is to have the most safety and hopeful possibilities.

Base logic: Anything unanalyzed means we move forward without knowing what is known, not known, nor the possibilities. Which means higher risk of experiencing, creating, or/and allowing injury, and higher risk of not working towards what is hopefully possible as best we can.

In Module 3, we go into all the aspects of our global existence that need re-analyzed, everything from dwellings to systems. This module is about bringing everyone together on some of the fundamental facts of our existence before we go into 3.

Reality of our Existence

Terms and Foundational Facts

So we can talk about all and parts of our reality, we are going to cover an abridged version of select terms and facts.

Note: My LC construct - I'm proceeding as if we all are people and didn't just come into the middle of a time. Though I hold all possibilities.

What is our Reality – the Unknown Truth of Our Existence

Logically we can never know for certain we know absolute truth, while paradoxically hold we possibly can. However, until we break the paradox, we have to live as we don't know – we will discuss this more as we proceed and in Module 3. That said, operating within the fact we don't have absolute truth, we consider: Is our existence from pure evolution, creation, simulation, or a mix of those? Are we part of a multiverse? Multiple dimensions? And so on.

We don't know the truth of our reality and haven't systemically analyzed* how our world is composed and functions at this point. Everything else is dependent on acknowledging this foundationally, and LC accepting and holding all possibilities. (**Unless there is some non-public individual or/and group that has, acknowledging all possibilities.*)

So, we have this unknown truth of our existence. Which is a pragmatically difficult place to live from. This fact is also part of and leads us into the losing premise of our existence.

The Losing Premise of our Current Existence:

While the following four categories are all part of the losing premise and as so overlap, they have been separated out for discussion.

- nature,
- lack of Information,
- source of harm
- consciousness and goodness coexisting

CONNECT ALL

Nature:

Nature overall formed or/and was formed against itself. Existence as we know it is cruel, and depending which life form you are, that's especially true.

Focusing on people:

There is the issue of how we are formed, without any other issues.

Then, for people to simply survive and progress, we were always going to have injure other life or/and risk our own wellbeing or/and life. Killing or/and injuring (directly or/and indirectly) other life for food, clothing, shelter, safety, and so on.

And while this overlaps with the next point of lack of information (LOI), having to learn how to live by experimentation, increased/increases the risk of injury to ourselves and other life.

However we came to be, there is nothing about how our existence is set up that is good (*while it could be worse*), and that is ongoingly evident as we continue through the losing premise.

Lack of Information (LOI):

Until the time we have all information, including knowing the truth of our existence and breaking the paradox of absolute truth (*which if you think that through, the possibilities are interesting*)-

With LOI we have the logic of "it depends". When we don't have the information we need:

- Whatever we choose could be the wrong choice, regardless of whatever information we do have.
- We don't know what unexpected might happen.
- There is the possibility of "it depends" to the good, but, we always have to be preparing for the worst that could be.
- We have to do so much with LOI, and in some situations make immediate decisions, experimenting with things we don't know. The process (doing or not doing something) is going to include risk, and possibly injury - whether that is to the person(s), part(s) of our world, more, or/and everything.

Side Note- while not part of the terms and facts, while every part of LC we have learned so far helps us with how to address that risk the best we can, there are some specific materials in the reality-based ICE in the appendix.

Source of Harm (SOH)

Let's define this a bit. Examples:

- There might just be some thing or being, that doesn't consciously and with intentionality wish harm, but causes harm out of their own nature.
- There might be some being that consciously with intent, wishes to and does cause harm.

And we will discuss approaches for all kinds of SOH, but for now, focusing on this component ~

CONNECT ALL

SOH, whether naturally occurring, or utilized or/and practiced by part(s) of all possible sources:

- There is the "it depends" - that it might have no rules and act arbitrarily, have some 'game' of unknown points of reaction, get triggered, or/and so on.
- It doesn't have to be capable of doing more than the array of what you can address, mitigate, survive, or/and the ultimate, it just has to appear to be that powerful and you are in a position where you have to function under that premise.
- The possibility of pure SOH: This SOH utilizes perfect logic, has all information, and isn't stoppable. It is able to predict everything you will do, and according to the fundamental of unchecked evil, will always win. (Of course paradoxically the good, and possible vs impossible.)

Since SOH, whatever the sources, is part of our existence, it has to be LC addressed the best we can.

And layering this in as we go for discussion: Until we break the paradox of absolute truth, giving all the possibilities of our reality, there is always the possibility of a more powerful SOH. So, the only way to foundationally survive is as a connected whole. Which means, for multiple reasons we will discuss, when confronted with a SOH we can address, we want to try and dissolve, neutralize, or redirect any attack - so that to whatever extent possible, neither we, other life, nor the source is harmed. Then depending on the source, when possible, either take care of it the best we can, or seek to create a connected relationship. And we will discuss the conflict in that after part 4, CGC.

Consciousness and Goodness Coexisting (CGC):

Consciously understanding pure goodness, and then having to consciously experience existence as we currently do, leads to constant injury.

Explanation: If I want to be as good as possible, I have to study and understand "What is goodness?" Then that process makes me aware of what it would be, and that awareness of how that isn't possible in how we currently exist, then experiencing and deciding the degrees of how far we are from it to live, causes constant injury – which to survive in a connective way in this existence requires takes a lot.

This is a pragmatic issue that has to be address with LC:

- As an individual.
- As foundational to discussions and decisions about our external connections. e.g. interpersonal interactions, global culture.

As a pragmatic issue, it is foundational to Module 3, as we can't discuss the frameworks without asking the question and doing the four-point processing through the outcome.

CONNECT ALL

Reflections at this point.

We aren't through terms and facts yet, and we are going to discuss these issues more in this module and then as a necessity thoroughly in 3, but a few quick reflections before we continue.

Connective – Competition – with Inequality – and being the LPV

Taking what we know of the Losing Premise~

Until we break the paradox of absolute truth, giving all the possibilities of our reality, there is always the possibility of a more powerful SOH, so the only way to foundationally survive is as a connected whole.

With that, outside of the foundational of not wanting to hurt innocence to whatever extent possible, we do want to be a connective as possible in all our interactions for other reasons. For example, with LOI, we might not know the final consequences. Examples: Does consciousness exist after death, and if so, how? Or does this life form have something that cares about it, that if it shows up, we want to be able to say we did the best we could.

So on the foundational, we do want to live as connectively as possible. Then, we come to the competition.

To truly have the most safety and hopeful possibilities, there needs to be victory over the Losing Premise. The word victory was chosen, as it leaves you without the impact of the losing premise. IF that is possible, then it is inherent (*until someone can prove otherwise*), that there would be competition for it, even as we might have to work together to achieve it – and **will** have to work together to address every portion of it that we can as a whole. So, on the one hand, we do need to live connected, while there is this co-existing inherent competition to be the Losing Premise Victor(s) (LPV).

Then, we have in our current existence the inequality of it, even with our best efforts. It's not the principle of to whatever extent possible making sure needs are met and living with as much equality as possible– we can understand and systemically work on that. However, there are the issues of geography, of choices that might need to be made in survival scenarios, the individual situations based on factors such as genetics or/and injury.

Note: I ache for myself, who I am attached to, every child and innocent, and for every form of life that experiences suffering it shouldn't. Existence as is, leaves us with limited options. So, while I don't know if it is possible, as long as the possibility exists, which only absolute truth could disprove that possibility, I am and will be working to be LPV.

CONNECT ALL

Is/are there a creator(s) behind existence?

Given the reality of our current existence:

- If we aren't pure evolution, and any source(s) has anything to do with our fundamental existence, it couldn't possibly have been with good intent. Of the possibilities -
 - There could have been an accident, e.g. Some nice being had a stroke, did this as an involuntary reflex, went into a coma and hasn't come out it.
 - It could have no consciousness of what it does – so neutral intent.
 - It was intentionally without good intent.

Other reflections

- What we covered in Module 1, and now the losing premise, gives us the foundational LC skills and data to analyze our experiences or/and beliefs, and are necessary for the next sections regarding the unexplained and unknown.
- With the losing premise and given the state of our world now, there are limited possibilities of true rest. And those take what we don't have right now. So that takes us back to the need for a solid LC foundation – and the search for being LPVs.

The Unexplained and Unknown

Now let's focus on another specific portion of our existence – The Unexplained and Unknown.

First, let us define what is meant by the terms Unexplained and Unknown.

And being LC, before we do that: I am well aware that individuals have had or/and are having experiences with the Unidentified and Unknown, and it with LC that I share the following -

Experiencers: is the current recognized term for individuals who have had or/and are having unexplained, or/and unknown source experiences (defined below), whether the experience(s) were or/and are positive, neutral, negative, a mix.

CONNECT ALL

However, while some individuals might choose to use the term as part of their identity, others may prefer person-first language of being an individual who has had an experience with the unexplained or/and unknown.

Then of those with experience(s), many need a being-first/trauma-informed approach, which might increase based on what happens or/and we find out. Which while that should be part of being LC, it is critical to emphasize.

Now the definitions for Unexplained and Unknown - with the reminder:

- We know experience does not necessarily equal source,
- Actions (including inaction) do not necessarily indicate desire or/and motivation.
- We have to LC go through all possibilities.

Unexplained: (Having ruled out any health reasons.) This is any unexplained experience in which the source is outside of the individual, whether it is experienced internally, externally, or/and both, in situations such as:

- UFO/UAP
- Interactions with non-people entities (NPEs) - aliens, gods, demons, angels, and so on (*acknowledging the inappropriate terminology, and we should be being-first, if the source is conscious at all, and then respectful of its life*);
- Interactions with a previously living person or other creature (*this has overlap with unknown*).
- Interactions with unidentified identit(ies). Which, while there are all the possible sources, could also include an external *unknown* source, as we don't know if who/what communicating was a living being, and the possibility has to be held.
- Experiences tied to the apparent reality of our existence.

Unknown: This is any unexplained experience in which the source comes from who we are as beings (*Excluding any health reasons – though as we discuss it, whatever the truth of the possibilities, if they are a part of us, they are part of our health*). There is evidence and logic for different possibilities, and we don't know for sure what we are as living beings and what we might be capable of, as a whole or/and as anomalies. Examples:

- "spiritual" experiences (Considering the current available science and possibilities, there is the logic of whatever the truth of the possibilities, they would all be materialist based since anything that exists would be materialistic.)
- Does consciousness exist after death?
- What are we capable of, such as what we term psi abilities?
 - While we think of this as a different category, the way psi is defined now would include: Are there connections between consciousnesses (e.g. a parent waking up and knowing their child in another country is in danger)?

CONNECT ALL

And if needed, a reminder - Knowing our LC approach for the most safety and hopeful possibilities, that obviously includes the Unexplained and Unknown, which are both part of *Five through the Filter*.

- **The unexplained in our existence:** There are many unexplained experiences in our existence. Not logically-connectively recognizing their existence and analyzing them the best we can, leaves us at minimum in a possibly dangerous situation. We might be unintentionally experiencing, allowing, or/and creating injury. We might be missing a possible source of hopeful possibility. And for some portions of the unexplained, the possible source(s) (people or/and otherwise), also underscore our need to be logical-connective, including preparing the best we can (which includes how to be connective).
- **The unknown in our existence:** Again, not addressing this LC, we might be unintentionally experiencing, allowing, or/and creating injury. We might be missing a possible source of hopeful possibility. And so on.

Wherever you were in your understanding before, now, or/and as we move forward, we do this LC individually and with each other. Let us continue to flow between terms, facts, notes, and get to analyzing some today, before we complete our safety packets and continue to form our network.

UX: Unexplained, Unknown, Both (*for ease of communication*)

While it is best to use the correct terminology, such as “I had an unknown experience”, “I had an internal/external unexplained experience”, “I had both an unexplained and unknown experience.” UX is used as a catchall indicator in the materials.

-

We know:

- There are all the possibilities of the reality of our existence,
- There is the possibility of other existence,
- There are all the UX experiences.

Governments, public and private groups, and individuals research or/and fund programs across the array, just not in any publicly logical way. This is to give a basis for that, and then we are going to look at some UX experiences that have patterns.

CONNECT ALL

PIPS- Possibly Infinite Possible Sources –include but not limited to (non-comprehensive, have overlap, but expanded for ease):

- Beings: People, other(s), or/and mix.
- Living Creatures (*need a better name*): from this world or/and others.
- Nature, the universe itself.
- Raw sources: Stand-alone, or/and maybe a part of life, e.g. an unrecognized or even currently inaccessible source; or consciousness/energy/?? of living beings - whether alive or/and after death.
- Components of Functionality {COFS}: e.g. Forces that either work on their own or/and can be or/and are used by beings; 'Time'; Do beings' thoughts or/and communication matter? Are there interacting forces between all areas of existence? And inter-queries: Do the COFS change based on our position in the possible conformation(s)? Do all COFS apply to all?
- Natural Abilities: Intrinsic, developed, non-developed, not discovered yet, impacted, or/and mix.
- Created tools or/and Modified Abilities

And an LC reminder - While considering PIPS, depending on reality factors and what is being looked at and for:

- No matter its actions, inactions, or/and mix it could potentially be: in need of protection, need help, a trap, a test, a mimic, an attack, we have a point of connection out of happenstance, possible rules, combo, or/and so on.
- What you are looking for could be tied to one, but always consider all.
- While generally everything has some level of impact simply from existence, and most things are a mix, you should consider all as possibly being benign, positive, negative, or a mix, whether that is with accuracy or allowance. (*And negative could be beyond the worst.*)
- All can be part of potential conformations we need to work through.
- Can individually be naturally occurring, created, modified, simulated, or/and a combo.
- Already exists or is developing/being developed and can still have impact.
- And so on

Also, all can possibly be manipulated.

Self-care and if needed Centering moment

So now that we have our foundation, we are going to do an analysis of some sets of UX, and set up how to continue doing so. And for ease, "Whatever PIPS" will be "WP".

CONNECT ALL

An analysis of the UX

To begin, the following table has examples of sets of data points that need to be individually and then cross analyzed. Obviously, these are not inclusive of all sets, nor comprehensive within themselves. And for all, we need to analyze for all possible: realities, PIPS, commonalities, differences, gaps, variables, anomalies, patterns, in and across time, **why(s)**. Including: discrepancies in narratives and data points; within COFS- possible separate rules of possible conformations; thinking beyond to the possibilities.

Category	Factors
UFO/UAP/other – Other Being array	<ul style="list-style-type: none">• Date of event• Type of event - sighting, interaction, physical signs• What was the behavior?• Was anything communicated outside behavior?• Location• Area before• Those involved before• Changes to anything after
Psychic-Medium array	<ul style="list-style-type: none">• How this started for them vs something they wanted. And if they sought it out, how did they find it? Percentage of difference.• What do they specifically do and all data points.• All the personal data points of and between both groups.• Their belief system.
Religion-Occult array	<ul style="list-style-type: none">• (Outside of known or unknown person factors) Any identified practices of each that have evidentiary impact, including those that identify an unexplained source, and all data points.• As indicated, root factor analysis of each. The origin, where, when, how, what else was happening - are they separate at all, do they intersect, and so on.• Changes over time, and any associated factors.
Power-Government array	<ul style="list-style-type: none">• If, then how it interplays• Trace back through time with all the rest, and currently• Questions around communications and actions

CONNECT ALL

Now, there is not any publicly known group that has done this cross-analysis. And being blunt, because of our lack of LC, there might be science available we don't have access to, and there might be science we could have but haven't done. However, with LC people, possible answers can be logically and connectively examined systemically and efficiently, even if we might inadvertently be harming innocent PIPS in doing so.

That said, there are some immediate discrepancies and patterns we can identify with what is open knowledge.

Discrepancies and Patterns

We are going to use our base from Module 1 and what we have covered so far in this module, to review behaviors and narratives.

As we work through the examples, we are going to think through these questions:

- What is conveyed during the experience - by behavior or/and messaging?
 - How does that line up with what we know about the total reality of our existence?
- What are all the possible PIPS* and explanations? (**including biological factors, such as emerging brain and other sciences*)

What we will recognize is:

- Some sets might have multiple sources.

Patterns of certain sets of WP seems to be a combination of blatant discrepancies, and (*as applicable*) distraction/playing the narrative (better word?).

- The 'blatant discrepancies' is what is happening or/and being conveyed doesn't like up with a LC reality. This "If you were logical and aware of your existence, there is no way you wouldn't question." *Holding the possibility, they could be just as unaware.*
- The 'distraction/playing the narrative' is playing out the narrative in different ways you interact with.
 - Then a seeming subset pattern, as part of the 'distraction', depending on the type of experience, is the "personality" of WP.
~Question for analysis and research: "What changes if any when the person changes?"
- The question of source(s) identity

CONNECT ALL

Then we will examine the possible explanations for the behaviors. Keeping in mind:

- Behaviors have to be evaluated for degree of correlation (0-100) to desire or/and motivation.
- With what we don't know, we stay neutral.
- Regardless of what we can know now or do not know, we are LC. Including how as applicable we proceed with caution with cost/risk/benefit decisions, to holding all possibilities.

Let's start with these unexplained sets in which the source is externally or/and internally communicating:

- Spirit guides
- Psychic-medium communications
- NPE interactions
- So on

SPACE TO WRITE

Again, with Lack of Information (LOI), we do hold all possibilities equally. For example, with all the analysis, we haven't ruled out WP are part of our immediate world. Nor, that there is an innocent source. We do know that individuals have the UX experiences, and while with LOI we are neutral to desire or/and motivation, the possibilities of the why's and the act of bringing awareness to the issue, is terrifying as an individual, for who we are attached to, all children and innocence, and the source(s) themselves. We hold all possibilities and worry about the array from, we might be hurting something innocent to it's the ultimate trap to it's both.

CONNECT ALL

Risks Non-Inclusive

You have the specialized ICE, Advance Directive, and Safety Plan (*this is what I have until we can get some experts who know of anything else – so all disclaimers*). While normally safety first, you need to know what risks we can cover and think through others, to do the plan as well as possible.

Sample of possible UX situations, with any or/and combo of sources:

- Might interact with you internally or/and externally.
- Could be or/and attach/connect to you
- Could interact in external ways around you.
- Could interact with others in any of the above ways.
- Could react by withdrawing from you, if attached/connected to start with. (Might be a good thing, but there are scenarios this could cause harm).
- For those with prior UX experience things could intensify or/and change
- For those without prior, might start having experiences you or/and those around you aren't prepared for.
- For those coping with mental health issues, you can experience a symptom that manifests as UX, whether positive, negative, so on; you can have an actual UX experience; or you can experience both a symptom and a real UX experience. So experiences at times might be more confusing or/and complex.
- While there might be layers of truth, there is the possibility that there are PIPS that can influence you to harm or/and kill yourself, or/and harm or/and kill others. And if applicable, since those can also be symptoms of health challenges, you might need to be extra careful. Then, for all individuals, that makes everything more complicated as far as safety planning, since you also might need to defend yourself, or/and others

We are going to go through *some* of: the possible risks with how this possibly happened, big picture possibilities, then pragmatics we need to address.

How it possibly happened:

- It could be an accident, with all the possibilities from a being, to the result of some natural phenomenon. Which with LOI it's hard to determine if that makes it more, less, or differently dangerous than intentional possibilities.
- There might be back room or/and even societal deals made through the ages. Whether out of ill intent, not, or/and a mix. Who knows what, how far, how many, so on.
- There could have been accidental cultural or/and unknown rules broken.

CONNECT ALL

Staying neutral as possible-

With LOI, being LC, remembering our goal, we stay neutral. And for whatever good they might do, some ideas ***depending on the situation***:

*Stay neutral – since experience doesn't equate to source(s), nor the desire(s) or/and motivation(s), and we have the end goal of being connective.

* Start communication with, "All caveats and disclaimers." Since, for example, we don't know if culturally, even communicating might give rights or/and violate something, and if there are legalities it might help.

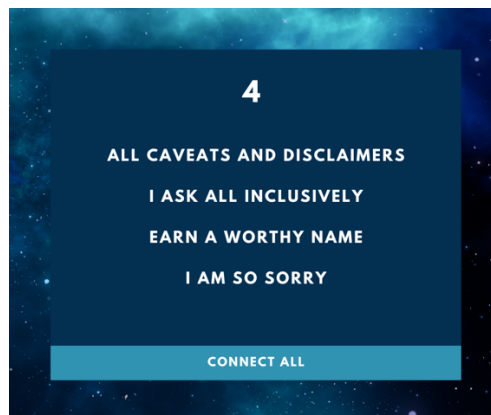

*Quickly establish a term with inclusive meaning, and hope WP has the capacity & is able to understand it. This might not help anything but you, since you don't if WP is even cognizant or if so, pays attention to what is going on, and so on - but, since there are the possibilities, it might help. E.g., in a situation where you or/and others are being communicated with in a way that is negative: Use a term that means the array from what you want to convey if WP are consciously with ill intent doing harm, to if WP are completely innocent and being forced to do harm- again, with the end goal of the communication to result with being connective. With lack of information (LOI), and depending on the type of negative experience(s), staying neutral isn't exactly natural, and so to hold all possibilities & convey all, use the term.

*Remember the cost/risk/benefit of any type of communication or/& experiments.

*If things are physically happening, try to record if possible.

*With LOI, any ask should be to all WP & all inclusive to the good.

This "4" is one possible example:

CONNECT ALL

Big picture possibilities. WP, in whatever possibly conformations:

- They are waiting for us to live LC, for whatever reason. They might even desperately need us to, and there is some kind of cost to others if we don't. Or the possibility if we don't do so, they will do something at some time.
- They benefit somehow from suffering or/and how we live. And if we start changing, they react and do something to cause more, move on, or/and so on in whatever conformations might exist.
- People practicing certain UX practices: What happens if people stop – worshipping, conveying messages that play out a false narrative, accepting experiences, and so on? What happens if people start looking for the truth? What are the possibilities for or/and to us as individuals, to the source(s)?

All I do know is awareness is a key point, which has suffering of its own, and again reemphasizes our need for LC.

Pragmatics we need to LC address

- There is the risk in making decisions for others. I risk you without your consent in telling you, and I risk you without your consent in not telling you. So, I tell you.
- Right now, until we have an LC world, people in general lack LC, which means you can't trust them. And that includes "wouldn't want to do harm" "good" people.
- Possible back room deals: Did anyone actually review, re-review or/and is re-reviewing any possible deals and the options? What might others do without trying all options? This includes governments, groups, or/and individuals.
 - Now, there is the possibility a backroom deal was made with good intent and reason, however, with LOI and being LC, we just have to do what we are doing.
- People (*for whatever reasons*), who don't want the greater good or/and would use any new information to try and get more power, resources, or/and so on.
- We don't know who and possibly what, monitors who and what, and how many possible conformations of that matter. And knowing there is/are some PIPS that can or/and has access to our mind/consciousness/??, what information ends up where is a constant risk.
 - Which on this, outside of any technology, there is the possibility a being might not have any option other than to be able to know other's thoughts. So, if that is the case, how would we learn to LC co-live?

CONNECT ALL

- As people do start being aware of what is happening, there is the array of risks to those who have had/are having/have UX experiences of any kind, and some in particular. So the more we are networked and protect each other the better. Again, another reason for networked community.
- Then there are the general LOI risks that have to be acknowledged. Global to personal. For example, what happens to a possibly innocent WP as we do change to LC? We still have to do what we have to do (*doing or not doing*), but we have to acknowledge all the possible consequences of what we do.

ICE-Advance Directive- Safety Planning – see pages 51-56

Setting-up Networked Community –

Like we learned in Module 1, for the most safety and hopeful possibilities we need to be a LC networked community. So, we are going to have a network and check in system.

Before Module 3:

- We go back to *Five through the Filter*. We just have more awareness, including having to be careful with or/and of certain people, as we do the work to change that.

CONNECT ALL

- If you have the resources or/and connections to others that do, we start doing the analysis of the data we have to understand our UX reality, until we can get to a global way.
 - With as much LC as possible, to whatever extent possible we have to do both the analysis and the research necessary. And on the research part, where people are involved it has to be a fully informed free will choice for those who can choose, and if they can't, then we are good and we protect. And all of it has to be as LC as possible. That should be obvious by now, but I have to make sure this is clear, being terrified of: what may happen to individuals if we don't try; what might happen if we do try - and if we do try, what the process might do; what might happen to who we are attached to either way; what PIPS might be hurt in the process.
 - And no system gets oversight, we are a network. That part is covered more in Module 3, it is not that complicated and makes a natural flow of information and feedback. It's also the same network that creates as close as we can get to true democracy.
- While we cover this more in Module 3, let us take a moment to discuss *constructing your construct*. We now have all this awareness of our existence (*from module 1 through module 2*), we are having to hold all possibilities, and so on – so choosing how we construct our construct with the most LC for ourselves and others is foundational for the most safety and hopeful possibilities. And whatever the possible impact on us, we cope with it because we have to, and hope and work like everything for the possibility there might be hopeful possibilities. And there are, until any absolute proof there isn't – which means a breaking of the paradox.

Construct Notes:

MODULE 3

Module 3: Now and Forward Frameworks, and Tough Topics - Gives realistic adjustable frameworks based on the data as we have it available and the functionality of the whole - and there is no perfect, so depending on the area we put in margins for the fact we can't be perfect, but still need boundaries to keep us within acceptable limits. Then with those frameworks, and the foundation from the other modules, we work through the tough topics the best we can. It seems like a lot - and as previously said, necessary and doable.

Objectives:

- Defining what we are working for
- Understanding the algorithmic framework
- Reason and formation of global network-community
- Personal and network-community constructs

The objectives of this module are interconnected. So there will be a brief overview of all of them to be able to discuss them, then as we go through select areas you can be thinking through them individually and as where they are interconnected.

CONNECT ALL

Defining what we are working for:

We know we want the most safety and hopeful possibilities, so we need to outline what that would be. We know with current knowledge and resources things can't be perfect, now nor as we move forward, and parts of our decisions will be complex. So we will begin with the simple basics, and then as a network, LC work through the complexities the best we can.

Understanding the algorithmic framework

With LOI, life is more than an algorithm, it has to involve choice- which at times includes the chance element. However, being data driven is foundational, and developing global adjustable algorithms based on data we have, and as we have it available, and the functionality of the whole, gives us our best options to make the best choices individually and globally. Then, depending on the area we put in margins for the fact we can't be perfect, but still need boundaries to keep us within acceptable limits.

Examples of application:

We have to reanalyze everything about how we live - dwelling, food, clothing, hygiene, transport, and so on - and based on what do we know, what we don't know, and what is possible, decide how to transition from using what we have now to what is best for the most safety and hopeful possibilities. (*acknowledging there are some things that might not need changed*)

Putting all the data into the algorithm, we might start with, for this geographic area: this many people live there, in these types of dwellings, need these type of resources, with this much land the community needs to plant these crops, and so on. The plan is for "x" parts to be sustained ongoingly, and "y" parts to transition later.

But then, that area has a natural disaster. The data helps with changes on temporary and long-term realignment with the global whole.

Reason and formation of global network-community

There is the basis of our goal, for the most safety and hopeful possibilities, the more LC we are networked the greater the chances of achieving that. And a few special points within that.

- Free will: Until we break the losing-premise, existence doesn't provide us the option of true free will, and there are differing degrees of that depending on our individual situation. However, given we exist as we do, to whatever extent we can have free will, it needs to be protected. ***We don't negate truly informed free will choices.***

CONNECT ALL

- The right to a personal voice: Within functionality, every individual has that right, and that doesn't work in a representative system. True democracy, or as close as we can get to it, would take the work, but it is possible.
- To establish and maintain the necessary: The network is necessary, from the algorithmic frameworks, to the sharing of information.
- Equality: This one is more challenging. As stated in module 2, it isn't the principle of to whatever extent possible making sure needs are met and living with as much equality as possible— we can understand and systemically work on that. However, there are the issues of geography, of choices that might need to be made in survival scenarios, the individual situations based on factors such as genetics or/and injury. Having a networked-community helps level that as much as possible.

Personal and network-community constructs

There are multiples areas of working through our constructs – from holding all possibilities, to recognizing the impact of that on areas like the current legal system (until we have a better way), to raising children, and so on. For the most safety and hopeful possibilities, our degree of margin depends on the area. This is where as a network, we LC work through the complexities the best we can, and find the individual and global degrees of margin. ***And we don't negate truly informed free will choices.***

Logic-Connection for the most safety and hopeful possibilities.

Defining what we are working for

Obviously, the ultimate goal is Losing Premise Victory to whatever extent it can be accomplished, and we will be working towards that. But, in the meantime, what is our incremental vision towards that? And there is overlap with this section and ***personal and network-community constructs.***

Understanding the algorithmic framework

Everything is individually and cross-analyzed for the greatest functioning of the whole.

Dwelling, food, clothing, hygiene, medical care, mental-emotional health needs, furniture, education, transportation, safety (from weather to worse), sustainability, unexplained and unknown, research, redundancy, and so on.

Reason and formation of global network-community

Current Network issues

- Understanding the work that needs done to transition
- Finances and resources, until everyone is where we no longer need money. (Money consumes resources, it doesn't create resources).
- Dealing with "legal" issues until there is minimal need if at all and a better network system. Including, dealing with nonLC reactions to reality and holding all possibilities.
- Network Communication –
 - Need analysis on best plan for redundancies.
 - The one issue right now is language. Development of one primary verbal and non-verbal world language is the goal, which also means we can evaluate for accurate and connective words, since I don't know of a language now that is what we need. We will also need to learn secondary and tertiary verbal and non-verbal communications for safety. However, there is the current and transition period of communicating across languages simultaneously. The resources are available, it's just having the access.
- Protection from People or/and Other Beings- *Truly informed free will choice is part of this, so the following is for those who choose.*
 - Addressing individuals: While it is currently necessary, the goal is to be trained enough mentally and physically to dissolve, neutralize, or redirect any kind of "attack" so that neither ourselves nor the other individual is harmed, and the other individual's needs are then LC met - which might include something we were unaware of we need to change. Accepting, in the interim and in certain situations: that might not be the outcome and we do the best we can to mitigate for both, or we have to make hard choices based on the information we have available. Which takes us right back to the quicker we are in an LC networked-community the better. *(There is so much in this to unpack, being person first, trauma informed, having non-verbal and verbal communication skills, physical skills, and so on. Including teaching on how "attack, might not be an attack".)*
 - Addressing possible other beings: This one is more challenging, as we don't have a way to narrow the possibilities, and whatever the source of attack might be beyond us. However, as with the above, we have to train mentally and physically to be prepared as possible, and try to do the best we can for all. And as science becomes available, there might be more assists for that.
 - For both, we will need to set up a training program that covers the array.

CONNECT ALL

Personal and network-community constructs

- Understanding Goodness (CGC)–
- The need for existence, quality of life, death– This one is a bit complicated based on LOI, and there will be the margin of personal choice.
- Reality, UX, possibilities – **If anything, it forces us to be who we always should have been. Where we truly listen, we truly believe, and we seek for the answers with the most LC for the individual and all.**
 - Proceed as if we are all people, animals are animals, and so on. Hold all possibilities, but proceed without paranoia or anything. If someone did suddenly reveal they aren't a person, or a rock starts talking, or whatever, it might take a moment to adjust, but after ruling out any other explanation, wouldn't throw us.
 - We will need to analyze things eventually, but NO lack of LC, and remember something could mimic or/and manipulate.
 - There are the current possible legal issues.
- Culture – As we are LC and cope with aspects of the losing premise, culture, depending how we define it, becomes an interesting thing.
- Raising Children– They might be safer as we become LC, but oh what an existence. And there are all the discussions of - who has children going forward, how many, how they are raised, and so on. And where all children are placed who need to be now. Every child is going to have a home and community.

Note on raising children: This one I struggled with even attempting to write – I am in anguish for every child that already exists, and I don't have any good answers, without LPV. And even then, while I know it has to be possible, I need more time to construct how that would work. I have starting ideas, but working through the issues.

That said, for now, part of assembling this came out of the desire to stop the things that there is NO reason for given what we are capable of: in this moment no child should be being raped, sold, physically hurt, hungry, exposed to avoidable violence, suffering in any way we can address. There is NO reason for it – and if it takes arguing how we are pragmatically connected, fine. Whatever it takes, it has to stop. And then we work through the rest the best we can.

For the moment, I am ending here. I am a girl who hurts for plants. I analyze how messed up existence is, how it should either not be or/and could be - and in that, there is me and who I am attached to. I started this looking for answers, I'm still searching, this existence gives no other options.

CONNECT ALL

Appendix

Resource List

(current as of March 3, 2021)

In an emergency call 911

National Suicide Prevention Lifeline: 1-800-273-8255 <https://suicidepreventionlifeline.org/>
(chat feature; en Español enlace; deaf and hard of hearing link)

National Child Abuse Hotline: 1-800-422-4453. <http://www.childhelp.org/childhelp-hotline/>
(multiple languages, text, and chat features)

National Sexual Assault Hotline: 1-800-656-4673. <https://www.rainn.org/> (chat feature; en Español enlace)

National Domestic Violence Hotline: 1-800-799-7233, 1-800-787-3224 (TTY) or text LOVEIS to 22522. <https://www.thehotline.org/> (chat feature; en Español enlace)

National Human Trafficking Hotline: 1-888-373-7888 (TTY: 711) | Text 233733
<https://humantraffickinghotline.org/> (chat feature; en Español enlace)

National Runaway and Homeless Youth Hotline: 1-800-RUNAWAY 1-800-786-2929 or Text: 66008 <https://www.1800runaway.org/>

Gang Involvement: If you are in of need support, or trying to leave, we haven't been able to find a USA national hotline. But often local/regional areas have programs you can reach out to. And while not specific to gangs, there is the Crisis Text Line, and as needed any of the others on or/and indicated by this list.

National Mental Health and Substance Abuse Hotline: 1-800-662-HELP (4357)
Or TTY 1-800-487-4889 (support available in English and en Español)
<https://www.samhsa.gov/find-help/national-helpline>

Crisis Text Line: Text HOME to 741741 <https://www.crisistextline.org/>

There is no way to include all national/regional/local hotlines/weblinks. But for yourself or/and others, if needed and as you safely can, reach out to these or/and other crisis, information, or any other resources available in your area. Medical care, food, shelter, utilities, legal help, resources, advocacy, and so on, are often available. If help is not available in your area, if/as you safely can, reach out to someone. Also, the websites/numbers, and usually others like them, are resources if you are worried about or need information on how to help someone else.

Some possibly helpful apps:

PTSD Coach app: <https://www.mobile.va.gov/app/ptsd-coach>

While developed by the VA this app is for anyone experiencing Post Traumatic Stress, or wanting to know more to help someone they care about.

WYSA stress app: Depression & anxiety therapy chatbot app (you can pick the free option)

Moving forward app: <https://www.veterantraining.va.gov/movingforward/>

While developed by the VA this app is for anyone coping with stressful problems.

Woebot Your Self Care Expert app: <https://woebothealth.com/> helps with multiple everyday stresses and challenges, including symptoms of depression and addiction.

Mindfulness apps such as: Headspace, Insight Timer, Mindfulness Coach, 10% Happier

Other apps: Provider Resilience, ACT coach, Virtual Hope Box, Well Body Coach, CALMapp

Helpful apps: _____

CONNECT ALL

SBNRR Mindfulness Practice – this can be modified to your needs and time available:

Stop – Stop what you are doing, take the pause, give yourself space. Use verbal or internal mental cues if you need to.

Breathe – Everyone is different, for some paying attention to your breath and taking a moment to breathe is helpful, for others you might need a different or combined approach, including skipping and going to Notice. For anyone, you might find you need to try different approaches at different times.

Notice – Notice what is going on in your body, thoughts, emotions. You are not judging yourself, just noticing what is going on.

Reflect – Where is this coming from? Why am I feeling this way? Any other curious questions that help clarify the source.

Respond – What is the kindest most compassionate way to cope with this and move forward? Again, using whatever questions might help you.

5-4-3-2-1 mindfulness practice: In your mind, out loud, or written:

- 5 things I can see.
- 4 things I can touch.
- 3 things I can hear.
- 2 things I can smell.
- 1 thing I can taste.

Mental – Physical – Soothing Grounding - Healthline -

<https://www.healthline.com/health/grounding-techniques#bonus-tips>

A few examples:

Mental: list as many things in a category as you can; list categories by the alphabet; do math and number exercises; go through anchoring facts

Physical: Pick up or touch something; breathing exercise; physical activity; use your 5 senses.

Soothing: picture a face of voice that soothes you; talk yourself kindly through it; list positive things.

Things that work for me:

CONNECT ALL

Specialized ICE – Advance Directive -Safety Plan.

The purpose of this packet

One of the foundations of self-care and community is being prepared. You never know what might happen, and having your basics in place could be the difference in life and death, or degree of injury, for you or/and others.

Basic preparedness includes:

- Having your ICE-Advance Directives on you electronically and on paper.
 - If available, someone else having a copy in the same ways.
- Having a basic safety plan
- Going through all the basic preparedness checklists, including more advanced safety planning.

This packet has basic adaptables of the first two and prompts the third.

It incorporates UX from the 91221 Connect All guide.

It presents ideas for areas that people might face the lack of logic and connection in our society- including UX, medical, mental health, identity, or/and any issue that is ahead of the science or/and culture.

Disclaimer and Important Information:

- **This packet is non-comprehensive, and all elements are presented as adaptable, only for those already informed, or who put in the work to become so.**
- **Creating an Advance Directive should be done thoughtfully from a place of being fully informed of all they can entail. It is recommended to research and understand the intricacies of advance directives, including your state guidelines. There are free resources available to help understand all that should be considered. This packet does not do that. It was created for those already informed to be able to adapt or/and use in an emergency when nothing else is available.**
- **Content includes ideas/thoughts that are in no way suggestions or advice.**
- **The drafter makes no claim to expertise for any part of this packet.**
- **The use of any part of this packet is solely at the discretion of the user, and the drafter of this packet is in no way liable for any use of, including modifications.**

This packet was drafted by Gwendolyn Downing Sept 12, 2021 as part of the Connect All guide, and may be modified in any way that benefits.

CONNECT ALL

ICE (not comprehensive ideas/thoughts):

Things to keep in mind whether things are just ‘normal’ or you have or/and deal with UX experiences.

- With possible disaster(s), in an emergency, or/and with situations like Covid, if you have support, they might not be with you nor accessible. And those working with you might not be good to begin with, and even the good ones, might not be their best with all the stress.
- You might not have the levels of consciousness or/and have the time to form any connection with whoever is working with or/and around you.
- You need to be prepared for any possible triggers, experiences, or/and your possible conditions. Including, you need to think about what your potential state, behaviors, or/and reactions might look like to others. Always thinking of that person/people who will not get it and react in the worst way. And that’s applicable dealing with ‘normal’ medical or/and mental health issues.
- Self-awareness, even when you know you need to be, might be challenging. *If there is any internal disconnect, especially if you aren’t in a place you can be sure you are even self-aware of it*, this creates a risky situation for you, which gets worse if there are those who don’t understand around or/and “taking-care” of you. Examples: disconnect due to a head injury or high fever, triggering of mental health symptoms, having a UX experience.
- **However, you have to be the one to evaluate the risk/cost/benefits of how open you should be. There are ideas below for how to try and use the ICE to get your needs met without revealing anything you don’t want to if that is how you assess things.**

If you can:

- Try to establish rapport first.
- Take charge of your experience.
 - At your discretion, let them know your needs and boundaries. **Remember, there are things with mental health, including complex trauma, or/and UX, that are “normal”.** That is true whether you are being direct, or if based on your assessment you choose not to be. For example, a lot of people are claustrophobic. So you could use something like to that to share your needs and not share anything else. Or if needed, in the context of your labels or/and experiences, do a comparison to help normalize your needs. Then in settings it applies, you can ask for info like that to be put in your chart or/and on a whiteboard, just like allergies.
 - You can address anything on the ICE that you might have concerns about either honestly or as if they are normal for anyone. You can use the important notes and cultural issues sections to either provide information or normalized examples for mental health or/and UX needs or/and considerations. For example: In important notes, you could address trauma responses. In cultural, put in things about UX.
 - Outside of the staff possibly being “we are the experts”, you might believe or/and be triggered to “they are the experts”. But you know yourself, so try to take them through the logic and connection of listening to you.
 - There is a “Connection, Logic, Choice” section to the ICE with ideas/thoughts you can extrapolate from as needed to help. Whether around your needs or/and UX aspects.
 - If you don’t feel safe, ask for someone else. And use reason, but file a grievance if needed.
 - If your support can’t be physically with you, ask to keep your phone, computer, walkie-talkie, radio, or/and so on, as close as possible.

You might have to go through these steps with each change in systems, personnel or/and shift change. Including reminding them of any needs or/and triggers, even with it in your chart or/and on the board.

Connection and Logic - Being aware and connected as possible, to do the least harm. (ideas/thoughts)

This is non-inclusive of principles, practices, and standards of care. These are just some possible ideas to extrapolate from or/and use your own words, to self-advocate or/and make the best decisions you can.

o Always take them or/and yourself back to logic, connection, and choice.

o Because I know you want to do the best you can for me, and do not want to perpetuate any sources of injuries I already have, increase injury to areas I am already injured, or create new injuries (other than what is completely unavoidable), these are things we need to agree on, and come back to as needed:

o What we don't know is greater than what we do know: about the reality of our world, our bodies, our minds/consciousness/?. And beyond that, each person's makeup is individual, and can have unique aspects.

So regardless of the science we do have or don't have, I need to know that *you will listen to me*, respect that.

o Even with the science we have, (0-100%) things you do to some extent is an experiment with me, especially when it comes to my mind/consciousness/?:

o We all have biases and disconnects. Be aware of any of yours, including: my medical dx, mental health dx, substance abuse dx, gender, gender identity, sexual orientation, race or/and ethnicity, socio-economics, culture, patterns of speech, functional ability, perceived cognitive ability, dress, hygiene, mannerisms, level of attractiveness, facts you might know about me or discover, your lived experience, how you are doing today, historical events or/and injuries, your training, and so on. I'll try and do the same. We will both try to have regard for each other as individual beings, whatever our past or/and present.

o We both recognize because of society or/and lived experience, that I might have reasons not to trust you, society, or/and the system(s) you are with. While I am making the effort to partner, the burden is on you to be trustworthy, not on me to trust you.

o You will be honest with me at all times about: possibilities and probabilities based on what you do and do not know; about what will help, what might cause injury, what might do both, and to what extent; what safeguards we both have; and so on. And we will have set times to check back in on those.

*-Here are examples of how to respond to me about what you don't know or are unsure about: When we use evidence, logic, connection, and choice, while we might feel the pain/burden/fear/_ of not having the answer, we can acknowledge and respond with: "We don't know, but let's see what we can find out." "Based on what we do know, here is what we can try. Here are the risks and probabilities involved, doing our very best to stay connected and do the least amount of harm, and to do whatever good we can." "While we might have to do what is necessary in the moment (which might include doing nothing but being supportive as possible), we will look for the best answers until we find them, following the principles." "Given ____, what is your choice?" (Note: the *we*, when possible, should include me and be a partnership in trying.)*

o You will do everything through a position of as much internal and external connection as you can. Have personal and systemic ways to keep yourself accountable to that. And while I will try and do the same, when I'm struggling or can't, you will equip yourself with the knowledge and skills to meet my needs in the best way. I would also like us to work together to have ways to check in with each other.

o If at any time I don't feel safe with you, because you aren't ____, I will tell you, or tell someone I do feel safe with, or file grievances, or/and so on as necessary.

o Principles: Logic is to objectively analyze everything, not just what is found but what is possible. Question everything, even what we think we know to be fact; Search for all facts and possible hypotheses, including what we don't have a working knowledge of; Question and identify our own and others' biases, disconnect, so on; Constantly check in with ourselves and others, as we do the work. Build in intentional times (whether things seem to be going well, awful, confusing, or so on) and practices to stop and reflect on beliefs, practices, the direction we are going and why; We do all this to not miss or summarily dismiss what we don't expect, from a place of bias, or/and so on, or/and create or/and perpetuate injury out of any of those factors, or not following any of the other principles of being logical and connective.

CONNECT ALL

Initial Safety Planning

Keeping all possible sources in mind: How can I both do what is needed to minimize any risks from influences to harm or/and kill myself or/and harm or/and kill others, while at the same time being able to protect myself or/and others as needed? And given my background, intelligence, creativity, anything outside of the normal* I need to consider? (*Guns, knives/sharps, meds, driving, drowning, hanging, alcohol, suffocation, poison by gas, jumping, and so on? My self-defense abilities?)

Preps and safe places:

What do I need to stay calm, center, ground or/and feel safe as possible?

(Next 3 if applicable)

Outside my ICE, any individuals I would like to be contacted should anything happen? Any limits with them on what to share?

What is our agreement on checking in ~ from everyday 'normal' (including if applicable either/any of us need to take a break, leave for a bit), to needing to go dark?

Outside of just checking in as scheduled and needed, is there anything others should look for to check in with me? If so, how should they approach me?
