RESILIENCE PRESENTATION SERIES

HUMAN CONNECTION TO REDUCE ADDICTION

**Andi Clements, Ph.D.
and Mary Jo Hedrick, M.S.**

Intentionally increasing interpersonal connection opens up avenues for addiction treatment that address root causes of addiction rather than its symptoms. In this presentation, we describe the strong association between childhood adversity and later problematic substance use, as well as the state of the research investigating the role of intense personal connection in reducing both substance use and the physiological need for substances.

DATE: March 20th, 2024

TIME: 1 - 2 p.m. (EDT)
