

The TIC Grade Trauma-informed Care Client Evaluation Tool

The first tool for clients/patients to evaluate trauma-informed care in social & healthcare service settings

**For more information on
obtaining the TIC Grade
Toolkit, click [here](#)**

The TIC Grade is a 20-item evaluation tool for social and healthcare service organizations and providers to assess their clients' perceptions of the quality of the trauma-informed care they received.

The Toolkit includes paper and electronic formats, scoring manual, and digital report generation.

License fee waivers available.

Free to students and researchers.
