

## *Your Population Health Data Resource Focusing on Children and Youth*

Kidsdata.org offers population health and demographic data on California children, youth and families.

Kidsdata can be used to:

- ✓ Assess community needs
- ✓ Make program or policy decisions
- ✓ Promote policy change
- ✓ Advocate for children

Easily find, customize, visualize, download and share data on more than 550 measures of child health, education and socioeconomic status. Data are available for every county, city, school district, and legislative district in California. Our continually-updated data comes from more than 35 trusted public sources, and we provide expert context, policy implications, and additional information/resources for each indicator.
