

Advancing California's Trauma-Informed Systems

WHAT IS THE ACTS PROJECT?

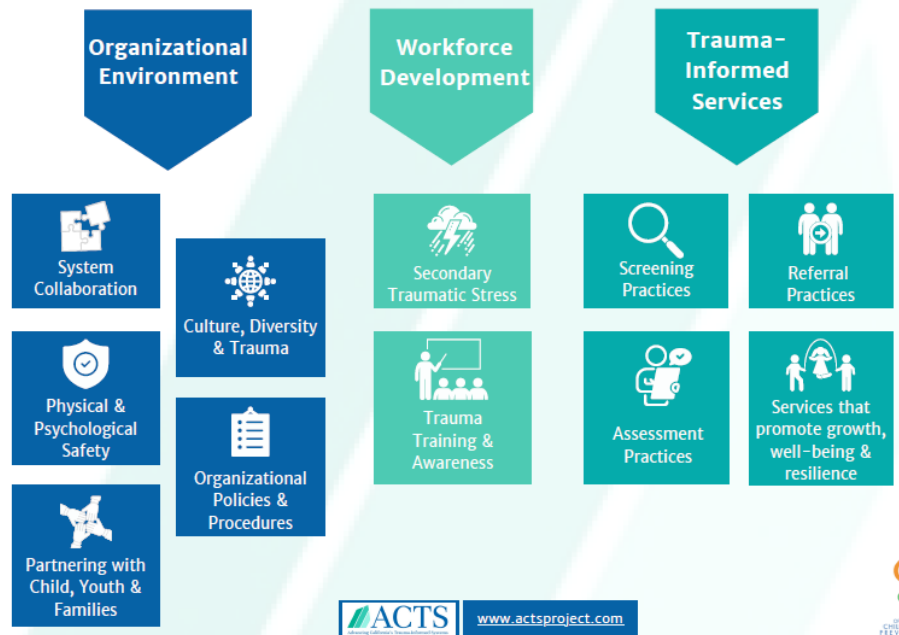

Our mission is to support systems in planning for, implementing, and sustaining trauma-informed change that aligns with best practice and science. We work with organizations to identify individualized areas for Trauma Informed Change (TIC) and provide in-depth resource sharing through the ACTS project.

We also offer workforce and leader-focused trainings on different aspects of TIC and time-limited Technical Assistance on TIC implementation and sustainment. This is made available at no cost to counties through our partnership with the California Department of Social Services, Office of Child Abuse and Prevention.

WHAT WOULD ADVANCING TRAUMA-INFORMED CARE LOOK LIKE?

Our trauma-informed menu serves as a blueprint for child welfare systems interested in implementing trauma-informed change.

Trauma-Informed Care Menu

ACTS PARTNERS

We have partnered with nine child welfare counties across the state of California.

ACTS IS LOOKING FOR NEW PARTNERS!

We are looking for child welfare county partners with motivation and capacity to engage in change practices dedicated to advancing trauma-informed care in their system.
