Nurturing Communities

A conversation exploring how safe, stable, nurturing relationships and environments are essential to the healthy development of all children.

April through June of 2018, over a hundred Civic Dinners will take place across Georgia with the aim of building a stronger social infrastructure among parents, families and communities all across Georgia. The stories, ideas and feedback collected from these dinners will inform a state-wide campaign led by the Prevention and Community Supports Section of the Georgia Department of Family and Children Services.
