

***“The child may not remember but the body remembers.”***

RESILIENCE is an award-winning, one-hour documentary which delves into the science of Adverse Childhood Experiences

(ACEs) and the birth of a new movement to treat and prevent Toxic Stress. It investigates the detrimental impact that ACEs can have on health – in childhood and beyond – [see trailer](#).

***“If you can get the science into the hands of the general population, they will invent very wise actions.”***

As part of the 'Making Kent & Medway ACE Aware' programme, and together with **Involve Kent**, our aim is to bring statutory, voluntary and community together, and to help generate the 'very wise actions' we hope will lead to lasting, whole-system change and the prevention of childhood adversity.

*(Making Kent and Medway ACE Aware is multi agency partnership led by Kent County Council Public Health , NHS England, the Academy of Public Health and Wave Trust.)*
