Methamphetamine use and its effects to the person and the community is one of the most serious problems facing Sacramento County. The impact associated with the use of methamphetamine is community-wide and has touched many systems, resulting in devastating consequences to individuals and our communities.

## **The goals of the Methamphetamine Coalition are to:**

1. Determine the nature and extent of the meth problem across County systems,
2. Raise awareness and understand the impact of meth use to other service systems and the community,
3. Review data from different systems in relation to meth to determine key points of impact,
4. Explore options and opportunities for increased treatment and service capacity,
5. Develop and recommend cross-system, data driven strategies, and response to this problem, and
6. Provide updates to the strategic plan
