EVIDENCE BASED CASE MANAGEMENT

WEAVE & CIBHS (California Institute For Behavioral Health Solutions)
Project Implementation 2019

Created in 1980 by Charles Rapp (University of Kansas) to help people with mental illness .

Moving from pathology & diagnosis to the person's strengths.

Starting point, we ALL have a desire to:

- Feel connected, loved, heard, respected and safe.
- Contribute, learn, be part of something greater than ourselves.
- Feel that our lives mean something.
- Identify and achieve meaningful and important life goals.

Strengths Model CM

Building Resiliency and Self-Sufficiency Skills

Strengths based approach allows us to:

- Implement and evaluate
- Two-generational approach
- Mitigate the impact of DV
- Build resilience and protective factors
- Clients are the director of their program
- See the whole person, beyond their DV experience

Administration for Children and Families Project

Building Resiliency and Self-Sufficiency Skills

TOOLS

Strengths Model Assessment (SA)

1. Home/Daily living
2. Assess-Financial
3. Employment/Education/specialized knowledge
4. Supportive relationships
5. Wellness/ health
6. Leisure, recreational
7. Spirituality /culture

Personal Empowerment Plan (PEP)

- Helps the client to identify goals
- Determine steps and action plans
- Timing and responsibilities

Program Participant Outcomes

Goal: Increase Self-Sufficiency

The Self-Sufficiency Scale documents progress towards adult self-sufficiency.

The average adult Self-Sufficiency baseline score was 49.0.

44 adult clients (92%) have a baseline assessment score and 0 have a matched follow-up score.

The average child/youth Self-Sufficiency baseline score was 32.3.

7 child/youth clients (24%) have a baseline assessment score and 0 have a matched follow-up score.

Goal: Increase Resiliency

Resiliency assessments collect progress towards becoming more resilient.

The average adult Resiliency baseline score was 47.3

38 adult clients (79%) have a baseline assessment score and 0 have a matched exit score.

The average child/youth Resiliency baseline score was 47.3.

28 child/youth clients (97%) have a baseline assessment score and 0 have a matched exit score.

Goal: Decrease Trauma Symptomology (TS)

Trauma assessments collect progress towards decreasing trauma symptomology. The child assessment administered is based on age and reading level. The child self-report assessment reports the child's thoughts and feelings whereas the child caregiver-report reports on the child's observed behavior.

The average adult Trauma Symptomology score was 12.7.

38 adult clients (79%) have a baseline assessment score and 0 have a matched exit score.

Caregiver-Reported: The average child/youth Trauma Symptomology score was 13.1.

20 child/youth clients (69%) have a baseline assessment score and 0 have a matched exit score.

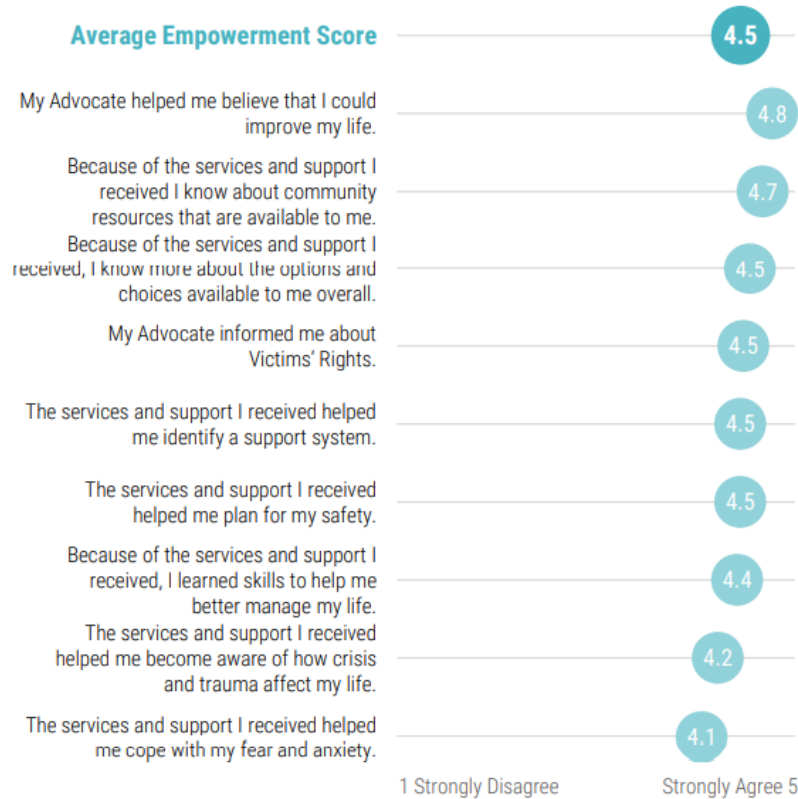

Empowerment & Satisfaction Survey Summary

The purpose of this survey summary is to report client feelings of empowerment after receiving services from WEAVE and satisfaction with services provided. This report summarizes the survey findings during the following period: Program FY19/20 Quarter 4 (October-December, 2020)

Empowerment

Participants ranked their level of agreement to statements of empowerment and satisfaction using a 5-point Likert scale with 1 = Strongly Disagree and 5 = Strongly Agree.

Satisfaction

"I absolutely LOVE & APPRECIATE [my advocate]. She is super supportive & I feel she does genuinely care about my son and I and our success in the future. She has been such a positive motivating & encouraging support pushing me forward to continue to reach my goals with my head held high." - WFAVE Client

"I am truly grateful to be in the care of WEAVE. Although very new to this program I am already feeling great relief from fear and am once again hopeful about my future..." - WFAVE Client

"This team is truly in love with their job. I've never seen anyone care for and as kind as weave group..."
- WEAVE Client
