

Adverse Childhood Experiences (ACEs) & Resiliency Fellowship

2016-17 | ACE Interface: Understanding Neurobiology, Epigenetics, ACEs, Resilience (NEAR)

5/23/17

FELLOWSHIP:

The 2016-17 ACEs & Resiliency Fellowship is a 9-month intensive interdisciplinary program designed for community members who serve as community educators on the topics of toxic stress, trauma, Adverse Childhood Experiences, or Adverse Community Experiences. The cohorts used the science-based ACE Interface curriculum.

OUR VISION:

Raise awareness...Build compassion...Foster resilience...Set the stage for Self-Healing Communities to form.

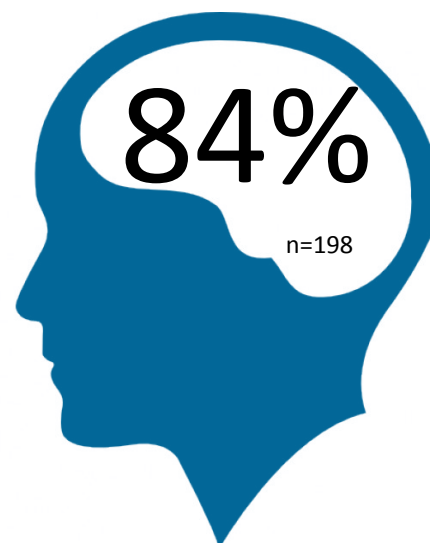

GOAL:

Increase community awareness of Adverse Childhood Experiences and Resiliency:

- 1) Develop an ACEs and Resiliency Speakers Bureau with 2 trained cohorts.
- 2) Conduct 50—100 community trainings in 18 months engaging 1,000 participants.

IMPACT TO DATE:

- Trained 28 ACE Interface Master Trainers and 28 ACE Interface Presenters
- Delivered 47 ACE Interface presentations to the community
- Conducted 3 Community of Practice Sessions engaging an average of 75 participants

Audience members rated knowledge of **ACE's impact on brain and behavior** as high or very high after the workshop

SPONSORS 2016-2017

Sonoma County ACEs Connection received a grant from the Health Federation of Philadelphia to establish the ACEs & Resiliency Fellowship program.
