

Trauma-Informed Agency Champions of Sonoma County

Changing Practices, Policies, and Culture to Address Adversity and Support Resiliency

Move beyond raising awareness about ACEs and take action to create a Trauma-Informed Community!

What is a Trauma-Informed Agency Champion?

Champions engage in two training tracks to develop skills for coaching agencies and schools in changing practices, policies, and culture to address adversity and support resiliency.

Who is a good fit for the program?

This program is intended for ACEs & Resiliency Fellows to continue their training as expert presenters and refine skills as action coaches. Other community members with similar ACE or trauma-informed training are also invited to participate.

What will I learn?

- Refined skills as an ACE Interface presenter (with a special refresher session with Laura Porter).
- How to develop an organizational action plan and utilize trauma-informed agency assessment tools.
- Coaching skills to partner with school or community teams in implementing trauma-informed strategies.

How do I sign up?

You'll register for 1-3 courses specifically for Trauma-Informed Agency Champions, **and** the 4-course series Restorative Culture Collaborative II.

Here's what fellows are saying about the 2016-17 experience:

Tim Raymond

Detective, Santa Rosa Police Department

2016-17 Fellow

"Not everybody embraces a compassionate approach to dealing with people," Detective Tim Raymond ACEs Fellow in 16-17 says, but the hard-to-argue-with brain science can help overcome that resistance.

Isabel Lopez

Executive Director, Raizes Collective

2016-17 Fellow

"You feel alone doing this work, like you're starting from scratch. But here, I felt like I had some reinforcement—people who really want to understand and share this information."

Here's what we've accomplished so far:

85+

ACE and Resiliency workshops presented in Sonoma County.

28

Master Trainers

28

Presenters

84% of workshop participants report increased community awareness of the impact of ACEs on developing brains

Updated 10/1/17
