---

## **Course Description**

Assessing and Managing Suicide Risk (AMSR) training provides core competencies to address common dilemmas facing clinicians working with individuals at risk for suicide. AMSR covers theory, practice and methodology behind suicide risk assessment and treatment, with the goal of providing better care to our clients.

## **Learning Objectives**

- List terms and definitions of suicide behavior
- Evaluate cultural considerations relevant to assessment and management of suicide
- Describe national and local statistics about suicide
- Apply skill by practicing asking about suicide directly and receive critique feedback about style
- Describe long and short term risk factor, including risk state, status, coping resources and potential triggers
- Describe and practice contingency & safety planning

*This course satisfies the requirements for RCW 43.70.442 and RCW 28A.410.226*

***Registration is separate from the Student Support Conference registration, and is required***
