Libby Buchanan, a respected abuse survivor, child welfare advocate and educator specializing in children with Post-Traumatic Stress Disorder, will speak about The Inner World of a Child with PTSD: Making Sense of Behaviors that Make No Sense.

Libby will draw the attendees into the world of children with PTSD in order to see, experience, and interpret the environment through the child's eyes. Upon completion, learners will be better equipped to translate and unravel the complexities of an abused child's behavior in order to build cooperation and a stronger rapport.
