

All Children Thrive
California

Imagine a city designed with child well-being at its center that fosters healing and resilience, so that all children, of all backgrounds, can thrive.

All Children Thrive-California (ACT-CA) is a community-led movement that:

- Transforms current systems to improve child and family well-being
- Connects community members with city staff and elected officials to create policies, programs and resources
- Builds networks of people and places co-designing innovative solutions and sharing their learning to help all of California's children thrive.

Learn how your city can get involved. During our virtual launch, ACT-CA will be hosting a LIVE conversation with interested cities, organizations, and other leaders about the initiative, its goals, funding and technical assistance available to participating cities.
